<p><u>NOVELTY</u> Non-aqueous cosmetics are prepared by mixing a liquid oil, a mineral salt and a surfactant which is extracted from cationic or non-ionic surfactant at 25 °C. Heat is generated when the mineral salt is mixed with water and an inorganic oxide.</p> <p><u>USE</u> Non-aqueous hair, skin conditioning cosmetics.</p> <p><u>ADVANTAGE</u> Provides an excellent high conditioning effect continuously on skin, hair due to the generation of heat at the time of usage when it is mixed with water. Improves the adsorption and adhesive strength. (PB) (7pp3296DwgNo.0/0)</p>	<p>JP 11228332-A</p>
